Summary

Information Security Compliance Analyst working on customer security audits, ITGC assessments, and third-party due diligence, with a hands-on security foundation in threat detection and malware analysis.

Experience

Information Security Compliance Analyst *Aug 2025 – Sept 2026*

SAP America Inc. - Customer Security Audit Team

- Execute ITGC assessments across SAP's cloud environment reviewing authentication, access controls, and logging configurations – validating compliance against SOC 2, ISO 27001, and ITGC frameworks.
- Serve as primary liaison for GDPR audit-rights engagements with enterprise customers, mapping questionnaire requirements to internal controls and presenting validated evidence on audit day.
- Identify control gaps across SAP Lines of Business and track remediation through Jira governance workflows, driving findings to closure against mitigation milestones.
- Built Power BI compliance dashboards and automated Excel Power Query reporting, improving control-monitoring visibility for leadership and audit stakeholders.
- Led a knowledge-sharing session on the EU Cyber Resilience Act (CRA), translating emerging regulatory requirements into team training ahead of reporting mandates.

Information Governance & Risk Assistant *Jan 2025 – May 2025*

Florida State University - Electrical & Computer Engineering Dept.

- Administered records and access workflows in ArcherGRC, consolidating governance data into a central risk registry.
- Identified and escalated data integrity issues to compliance leadership, supporting accurate departmental risk reporting.

Data Security & Access Control Analyst *Oct 2023 – Dec 2024*

Florida State University - Office of Admissions

- Enforced FERPA-aligned access controls over sensitive student records in Slate CRM across high-volume workflows.
- Built data validation checks that reduced manual errors by 30%, strengthening data integrity for compliance reporting.

Projects

SOC 2 Type II Examination Simulation (Auditor-Side) *AICPA TSC, ITGC Testing, Attribute Sampling*

- Scoped a simulated SOC 2 Type II examination across Security, Availability, and Confidentiality, building a 19-control matrix mapped to the AICPA TSC.
- Tested access and change controls across 50+ samples from completeness-validated populations, identifying 4 exceptions and a branch-protection design gap.

AI Vendor Risk Assessment - AI Meeting Assistants *ISO/IEC 42001, NIST AI RMF, TPRM*

- Designed a 28-question AI due diligence questionnaire mapped to ISO/IEC 42001, NIST AI RMF, and the EU AI Act, assessing two vendors' public documentation.
- Recommended approval with conditions vs. escalation, defining 7 contract and configuration conditions and 10 follow-ups.

Pinterest Threat Modeling & GRC Risk Assessment *STRIDE, NIST CSF, Risk Register*

- Conducted STRIDE-based threat modeling of Pinterest's platform, mapping identified risks to NIST CSF security controls.
- Built a risk register of control gaps, vulnerabilities, and compliance issues, with mitigation recommendations for each risk.

SOC Analyst Simulation *Splunk, MITRE ATT&CK, Wireshark*

- Investigated anomalous logins in Splunk and Wireshark, flagging lateral movement mapped to MITRE ATT&CK.
- Documented findings, escalation paths, and response procedures, from initial detection through escalation.
